

1-877-MYTAGIQ (877-698-2447)

Field Types

The standard product has 32 read/write fields with 16 characters of space available in each field.

For example: abcdef0123456789

TagIQ applications can be customized by having field types pre-defined. There are four (4) types of fields.

1. Alpha Numeric
2. Write Protect
3. Date
4. Pull Down

Once the field types have been defined they can not be changed. The field name labels can still be changed. Field type and field name are different. The field type is pre-defined and the field names can be changed at any time.

I. Read/write – Data in this field can be edited by any licensed user.
